# Documentation for Recipe-Browser project

When the user opens the website, the home page appears like this:

3 dashboard items: Breakfast Recipes, Lunch Recipes, and Dinner Recipes can navigate to each respective page. The user can also explore them from the contents of the home page.

Clicking on the nav bar item goes to the detailed page of each type of recipe.

There the user can find 3 different recipes depending on the type of recipe. Clicking on them shows the meal's recipe and ingredients.
